

# URBAN ecoMotion

eco-friendly movement and commuting  
in urban and intercity environments

## **Recreational-, service and charging facilities for cyclists in Hurum**

- Production and supply of furniture and equipment related to green commuting, for public spaces in Hurum
- Combinations of resting facilities, bike storage, charging of electric bicycles, lighting etc
- Placement along popular cycle-routes, schools, and other suitable locations
- Designed and produced locally, in local materials

## **Purpose**

- Encourage to wider use of green commuting by bicycle
- Creating social meeting points, hang-out areas in an outdoor environment
- Promotion of healthier life-style for all ages
- Promote Hurum's eco-focus and green profile, both locally, and nationally
- Creating activities and promotion opportunities for local manufacturers and businesses

## **Suggested facilities**

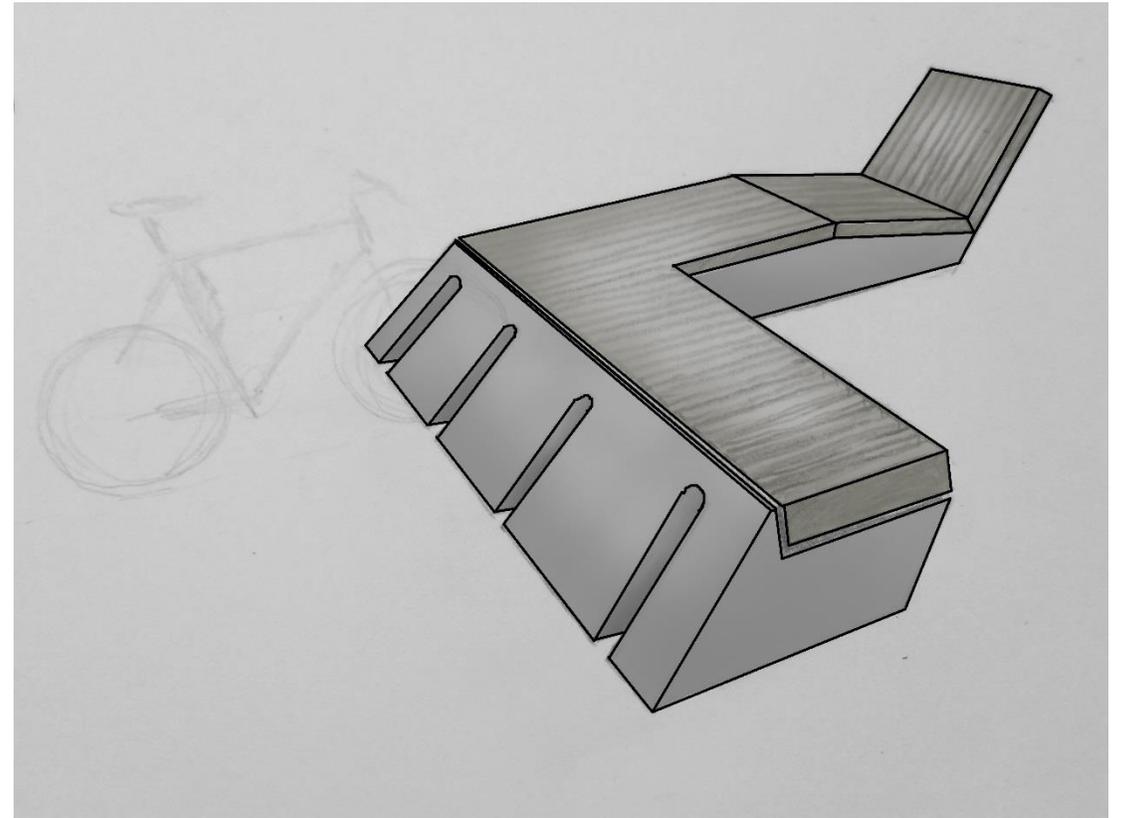

- Social meeting points with possibilities for rest, recreation, service and charging
- Manufactured in local materials, such as wood, concrete and steel
- Design to be unique, and to be promoted as such for Hurum, as a cooperation between municipality and businesses.

## Resting/recreational facilities

Different modules and equipment available and to be designed

Design and manufacturing to be a cooperation and joint venture between local providers and services.

Example of combination bench/bike-rack/charging in wood/concrete

## **Our Vision and our Mission**

- Urban ecoMotion's main goal is to be our customers chosen partner in eco-friendly commuting in urban and intercity environments.
- Our target customers are counties, municipalities and suppliers of equipment to public spaces.
- We strive to be a green supplier through all products and solutions, supported by future sharing economies.
